Projects

Comprehensive code review covering static text, dead links, dark mode compliance, missing features, and security across both projects.

Project 1: EntrenaDojo (dojotrack)

Flutter-style martial arts club management app with i18n support (EN/ES/GL).

1. Static / Hardcoded Text

Text constants that should be localized or dynamically sourced.

File	Line(s)	Issue	Fix
sidebar.tsx	88	Default clubName = "Your Dojo" is English in a trilingual app.	Use translated placeholder from useTranslations.
constants.ts	4-8	BRAND.tagline hardcoded in English. Used in footer.	Move tagline to i18n messages.
constants.ts	322-339	DISCIPLINES labels all English-only. Appear in forms, badges, public page.	Add i18n keys for discipline labels.
constants.ts	386-400	REQUIREMENT_TYPES labels English-only ("Time at rank", etc.).	Use i18n keys.
constants.ts	406-414	BILLING_INTERVAL_LABELS English-only ("Monthly", "/mo").	Use i18n keys.
constants.ts	56-318	All belt names English-only ("White Belt", "Blue Belt (2nd Kyu)").	Belt names should be i18n-aware or stored per club in DB.
layout.tsx	13-16	Root metadata title/description hardcoded in English despite locale available.	Use getTranslations for locale-aware metadata.
student-form.tsx	18-19	inputClass uses hardcoded light-mode colors (border-slate-300).	Use theme tokens (border-border, text-foreground).
class-form.tsx	31-32	Same hardcoded border-slate-300 / text-slate-700.	Use theme tokens.

2. Missing API Routes / Dead Links

File	Line(s)	Issue	Fix
page.tsx (landing)	103-106	Footer "About" and "Privacy" links are dead (href="#").	Create /about and /privacy pages or remove links.
students-table.tsx	139-140	Attendance always shows "---". Payment always shows "Pending".	Wire to real attendance/payment data.
club/[slug]/page.tsx	262-267	"Schedule" section is permanent placeholder. Never shows actual classes.	Query and display actual class schedule.

3. Dark Mode Issues

EntrenaDojo primarily uses CSS variables correctly. However, several forms break this pattern with hardcoded slate-* colors that have no dark variant:

File	Line(s)	Issue	Fix
student-form.tsx	18	border-slate-300 on inputs -- no dark variant.	Use border-border.
student-form.tsx	19	text-slate-700 on labels -- no dark variant.	Use text-foreground.
student-form.tsx	151	bg-white on select elements.	Use bg-background or bg-card.
student-edit-form.tsx	23-24	Same border-slate-300 / text-slate-700 pattern.	Use theme tokens.

File	Line(s)	Issue	Fix
class-form.tsx	31-32	Same issue on class form inputs and labels.	Use theme tokens.
session-manager.tsx	247	border-slate-300 bg-white on drop-in select.	Use border-border bg-background.
session-manager.tsx	277	border-slate-300 on cancel reason input.	Use border-border.
login/page.tsx	58	bg-white, border-slate-100 on card.	Use bg-card, border-border.
login/page.tsx	81-82	text-slate-700 on labels, border-slate-300 on inputs.	Use theme tokens.
register/page.tsx	101, 152	bg-white / border-slate-100 card pattern.	Use theme tokens.
register/page.tsx	179-219	All form inputs use border-slate-300 bg-white.	Use theme tokens.
club/[slug]/page.tsx	137-364	Entire public club page uses hardcoded light palette. No dark support.	Add dark mode variants to all classes.
settings-form.tsx	262-271	Toast uses bg-white, shadow-slate-900/10.	Use bg-card, shadow-foreground/10.

4. Missing Features / Incomplete Implementations

File	Line(s)	Issue	Fix
students/[id]/route.ts	N/A	No DELETE handler for students. Can deactivate but never delete.	Add DELETE route or confirm soft-delete is by design.
students-table.tsx	139	Attendance data never populated -- always shows "---".	Query actual check-in counts.
students-table.tsx	142-144	Payment status hardcoded to "Pending" amber badge.	Check membership status and display correct badge.
classes/page.tsx	N/A	No edit page for classes. Create and Delete exist, but no Update.	Add edit form + PATCH API route.
competitions/page.tsx	N/A	No edit or delete for competitions after creation.	Add edit/delete capabilities.
sparring/page.tsx	N/A	No edit or delete for sparring sessions.	Add edit/delete capabilities.
belts/page.tsx	N/A	No way to delete or reorder belt ranks from UI.	Add rank reordering and deletion.

5. Security Concerns

File	Line(s)	Issue	Fix
students/route.ts	10-16	GET returns empty array when DB unconfigured without 401. Inconsistent response structure.	Minor -- acceptable for dev.
students/[id]/page.tsx	42-43	getStudentProfile(id) has no clubId param -- could return students from other clubs.	Verify scoping by club in lib/queries.ts.

Project 2: Mensajeras

Next.js pigeon derby auction platform. Spanish-only. Supports dark mode via ThemeToggle.

1. Static / Hardcoded Text

File	Line(s)	Issue	Fix
page.tsx (landing)	6-21	Landing page steps array has hardcoded Spanish text.	Acceptable for Spanish-only; move to constants file.
page.tsx (landing)	62	"Plataforma exclusiva para colombofilos" hardcoded inline.	Move to constants or config file.
derby/config/page.tsx	271-272	URL preview hardcodes "mensajeras.es" instead of NEXT_PUBLIC_URL.	Use process.env.NEXT_PUBLIC_URL.
derby/page.tsx	38-39	"Bienvenido" and approval message hardcoded inline.	Extract to constants.
derby/page.tsx	88	"Pendiente de aprobacion" hardcoded inline.	Extract to constants.
faq/page.tsx	4-37	All FAQ content hardcoded in component.	Move to separate data file or CMS.
bidder/page.tsx	87-88	"Sin subastas activas" hardcoded.	Extract to constants.

2. Missing API Routes / Dead Links

File	Line(s)	Issue	Fix
items/[id]/page.tsx	99-104	"Editar" button links to /derby/items/\${id}/editar -- page does NOT exist.	Create edit page or remove link.
api/derby/items/route.ts	N/A	Only POST (create). No PATCH or DELETE for items.	Add PATCH and DELETE handlers.
subastas/[id]/page.tsx	N/A	No edit page for auctions. Once created, cannot be modified.	Add edit form for draft/active auctions.
middleware.ts	55	Dead code: publicDerbyPaths = ["/derby/a-pedra-da-sal"] declared but never used.	Remove unused constant.
admin/page.tsx	142-162	Admin approve/reject uses raw HTML form POST, bypassing CSRF.	Use client-side fetch with confirmation.

3. Dark Mode Issues (CRITICAL)

~80% of pages are broken in dark mode despite having a ThemeToggle. Only the derby dashboard and subastas list use dark: variants correctly.

Derby Admin Pages (most severe):

File	Line(s)	Issue
items/page.tsx	41-89	text-slate-900, bg-white, border-slate-200 throughout.
items/nueva/page.tsx	97-121	Entire form: bg-white, text-slate-900/800/700, border-slate-300/200.
items/[id]/page.tsx	91-239	Item detail: text-slate-900, bg-white, border-slate-200. All light-only.
pujadores/page.tsx	87-91	text-slate-900, text-slate-500.
PujadoresList.tsx	91-129	bg-white, text-slate-900, border-slate-300/200.
transacciones/page.tsx	48-71	text-slate-900, bg-white, border-slate-200.

File	Line(s)	Issue
config/page.tsx	127-176	All form inputs and section cards: light-only colors.
subastas/nueva/page.tsx	69-88	Auction creation form entirely light.

Bidder Pages:

File	Line(s)	Issue
bidder/layout.tsx	12-40	Header and bottom nav: bg-white, border-slate-200, text-slate-900.
bidder/page.tsx	59-130	All auction cards and empty states: light-only.

Auth Pages:

File	Line(s)	Issue
login/page.tsx	62-105	Card, logo, form labels, inputs, buttons: all hardcoded light.
registro/page.tsx	97-183	Card, all form inputs: bg-white, border-slate-300.

Admin & Public Pages:

File	Line(s)	Issue
admin/layout.tsx	18-20	Sidebar: bg-white, border-slate-200, text-slate-900.
admin/page.tsx	74-186	Entire admin panel: all light-only colors.
admin/derbys/page.tsx	14-30	Table: bg-white, border-slate-200, bg-slate-50.
faq/page.tsx	41-70	Entire FAQ: bg-white, text-slate-900, border-slate-200.

4. Missing Features / Incomplete Implementations

File	Line(s)	Issue	Fix
items/[id]/page.tsx	99-104	Edit link points to non-existent page. No item editing.	Create edit page and API route.
N/A	N/A	No way to DELETE items from catalog.	Add delete button + DELETE API route.
N/A	N/A	No way to DELETE auctions, not even drafts.	Add delete for draft auctions.
N/A	N/A	No way to edit auction details after creation.	Add edit for draft-status auctions.
pujadores/page.tsx	N/A	No manual invite from pujadores page. Invite only within auctions.	Add send-invitation form.
admin/users/page.tsx	N/A	User list has no actions (no delete, role change, details).	Add user management actions.
admin/derbys/page.tsx	N/A	No deactivate/suspend for derbys. Only approve exists.	Add deactivate/reject actions.
bidder/historial/page.tsx	N/A	History page has no search or filter capability.	Add date range and status filters.

5. Security Concerns

File	Line(s)	Issue	Fix
admin/derbys/page.tsx	4	Queries ALL derbys without auth check. Relies only on layout guard.	Add explicit admin check as defense-in-depth.
admin/page.tsx	34	Queries all users, derbys, auctions, bids with no page-level auth.	Add explicit admin verification.
admin/users/page.tsx	N/A	Same pattern -- no auth check in page.	Add explicit admin verification.
items/[id]/page.tsx	25	appUser! non-null assertion could crash if User record missing.	Add null check for appUser.
subastas/page.tsx	49	Same appUser! non-null assertion pattern.	Add null check.
pujadores/page.tsx	14	Same appUser! pattern.	Add null check.
items/page.tsx	25	Same appUser! pattern.	Add null check.
api/derby/items/route.ts	N/A	Image upload -- need to verify server-side file type/size validation.	Verify server-side validation exists.
middleware.ts	55-56	Public path detection regex is complex, could be bypassed.	Simplify public-path detection logic.

Critical Issues Summary

EntrenaDojo

#	Issue	Description
1	i18n Gap	Belt names, discipline labels, requirement types, and billing intervals are all English-only constants, breaking the ES/GL experience.
2	Dead Footer Links	"About" and "Privacy" link to # with no target pages.
3	Hardcoded Student Data	Attendance shows "---" and payment always shows "Pending" regardless of actual data.
4	No Class Editing	Classes can be created and deleted but never edited after creation.
5	Form Dark Mode	Auth pages and forms use hardcoded slate-* colors without dark variants.

Mensajeras

#	Issue	Description
1	Dark Mode 80% Broken	Only 2 of ~15 pages properly support dark mode despite having a theme toggle. Login, registration, item management, config, admin, FAQ, bidder, and transaction pages all use hardcoded light colors.
2	Dead Edit Link	Item detail page links to /editar which does not exist.
3	No Item CRUD	Items can be created and viewed but not edited or deleted.
4	No Auction Editing	Auctions cannot be modified or removed after creation.
5	Non-null Assertion Crashes	Multiple derby pages use appUser! without null checking, which will crash if the Prisma User record is missing.
6	Admin Auth Gap	Admin pages rely solely on layout-level auth, with no page-level verification. Defense-in-depth is missing.
